

Project title:
Phytocap Design Solution

Client:
Confidential

Category:
Project Management

Location:
VICTORIA

Project Description

During an internal environmental audit, a company identified a contamination issue associated with a legacy waste facility on land now owned by the company. The company's environmental department did not have the expertise to manage this contamination issue internally. CARAS guided the company through the remediation process, liaising with the EPA and the Site Auditor, and receiving approval from the EPA for the preferred remediation option.

Services Provided

- Review of reports by specialist environmental consultants
- Detailed costs breakdown of remediation options
- Identification of preferred remediation options based on costs and construction risk
- Detailed Phytocap Design solution
- Consultation with an EPA Auditor to achieve sign off
