

Project Description

Water Infrastructure Group (WIG) entered into a contract to design, construct and operate a Bio solids Management Plant. The project encountered a number of unexpected events in the design and construction of the works that resulted in a negative financial outcome. CARAS were engaged to provide a forensic review of the project to determine the root cause of the difficulties and produced a book of claims for cost recovery for the client.

Project Title:
Barwon Biosolids

Client:
Tyco Legal Department

Category:
Expert Reports

Location:
Barwon Heads
VIC 3227

Services Provided
