

Project Description

CARAS were employed to review numerous earthworks specifications, geotechnical reports, and design reports for a large redundant quarry being transformed into an industrial estate in Western Sydney. CARAS ensured that the works were completed in accordance with the specification and that adequate environmental controls were in place to protect against ongoing erosion.

Project Title:
Greystanes Quarry

Client:
Dexus

Category:
Expert Reports

Location:
Western Sydney
NSW

Services Provided

- Review of Geotechnical data
- Identify design concerns
- Provide factual reports
