

# Mattia Bianchetti Fettolini

Mattia brings his engineering and planning skills, gained from his varied international work experiences and studies at the renowned University of Padua, to the CARAS team. His sharp attention for details helps him during the initiating, planning, execution, controlling and closing out stages of a project.

Mattia is an excellent communicator and this, combined with his interpersonal skills, allows him to positively liaise with different types of stakeholders within the work environment. Mattia has a strong sense of organisation and the ability to methodically analyse problems which allows him to be in full control of every project.

Mattia worked on numerous projects taking on the role of client-side Project Manager and on-site Superintendent, liaising with clients and contractors to ensure that the technical, financial, time and administrative risks for every project were identified and that necessary controls implemented.

Mattia delivered projects from inception to completion, providing several core project management services such as: reporting and stakeholders' management; contract administration; quality, environmental, WHS compliance review; contractor and consultants procurement; on-site superintendence; program schedule development and tracking; cost plans development and tracking; tender assessment and risk review; design constructability review; liaison with Local Government Authorities, public and private utility/services providers and State Government Authorities.

Mattia is currently working on several projects regarding civil infrastructure projects, land development projects and remediation strategies for contaminated lands.
