

Wayne Wilson

Wayne Wilson has been working in the Civil Engineering and Contaminated Land Remediation Industries for 40 years. Wayne's expertise is in assessing the risk profile on a civil or remediation project to ensure that all construction risks are identified. Wayne develops a dollar estimate of the risks on a project from first principles based on his extensive experience.

Wayne's career in the construction industry began in the Hunter Region with Hawkins Construction in 1974. Wayne served his time from the ground up and worked his way through the bid team at Hawkins to become an Estimator on major civil infrastructure projects.

He joined the P. Ward Civil Engineering in 1986 as a Senior Estimator and his talent was rewarded by various promotions throughout a 25 year career culminating in his role as a Director of Ward Civil and Environmental Engineering Pty Ltd with specific responsibility for Construction Risk across over \$80 Million of turnover per annum.

His experience includes business development, management of the estimating department, risk reviews, contract negotiations, development of a proprietary estimating software, management of external consultants and subcontractors.

In 2012, Wayne moved on in his career to become a mentor and specialist advisor in Civil Construction and Remediation Projects.

Mr. Wilson is recognized and respected by his peers in the industry.
